Projects

Boutique Management System.

Language: Visual Basic 6.0.

Duration : 6 months.

The proposed system is to automate the manual system of a Boutique. This Boutique Management System (BMS) automates various tasks like employee management, stock management, various billing, orders, purchases and the generation of various reports.

Online Dietician.

Language: C# (. Net framework)

Duration: 6 Months

The system has mainly 3 users an admin, dieticians and finally the common users. The admin will control all works that are undergoing in this site. Both the Dieticians and the common users have to register in the site. The admin will approve them.

The approved users can use the site. The system helps the common people to know their needed diet plans by using their height and weight and there by calculating the Body Mass Index(BMI). According to the calculated BMI the system shows the diet plan that the user has to follow. And the system also shows diet charts and pyramids.

If the user need to book a dietician the system will show the list of registered dietician on the site. From there the user can book a dietician.

Online Buiding plan development

Language: PHP

Duration: 6 Months

The application has mainly three users Admin, Engineer and the Customer. The admin will control all works that are undergoing in this site. Admin will register all engineers and add types of works that are done in this site. The user can register in to the site. Later using the username and password that is developed at the time of registration the customer can login to the site. The customer has provisions for viewing the works completed by each engineers in the site. By evaluating the works the customers can select an engineer.

After that they can specify the requirements for their building pan along with the plot sketch. The selected engineer will evaluated the requirements and fix a date for plan submission and also an amount for the plan.

After the Engineer is uploaded the plan the customer can view it. If they need modifications they can specify it and again the engineer will evaluate the modifications and resubmit the plan with the prescribed modifications. If the customer accept the plan the payment procedures starts. The customers having the provision for providing the feedback of the system. And the admin will evaluate the feedback and will provide the reply If it is needed.
